Comment: A double-track railroad line connecting Prelouc, Hermanuv Mestec, and Prachowice and a shunting station in Hermanuv Mestec will be built within the Five Year Plan. The double-track line is to make possible the delive of 60 trains of limestone per day to the plant in Dvur Kralove. Comment: A single-track line is in existence between these towns. The number of trainloads of limestone seems excessively high.)	g 25V1
